

Location Plan

Legend

- Swale Borough
- JBA Groundwater Flood Map Depths**
 - Groundwater levels are either at or very near (within 0.025m of) the ground surface.
 - Groundwater levels are between 0.025m and 0.5m below the ground surface.
 - Groundwater levels are between 0.5m and 5m below the ground surface.
 - Groundwater levels are at least 5m below the ground surface.
 - Low risk.

Notes

The modelled groundwater levels are not predictions of typical groundwater levels, rather they are flood levels. The 5m resolution JBA Groundwater Flood Map categorises the head difference (m) between the predicted groundwater levels and the surface level into five feature classes based on the 100-year flood model outputs.

It should be noted that the JBA Groundwater Flood Map is suitable for general broad-scale assessment of the groundwater flood hazard in an area, but is not explicitly designed for the assessment of flood hazard at the scale of a single property.
