

Proposed Waiting Restrictions - Stockers Hill, Boughton-Under-Blean
SECOND CONSULTATION

ANNEX B

Name	Address	Support	Object	Notes
Response 1			1	Proposed DYLS will restrict householder's parking, would have to find alternative parking higher up street which is already at full capacity. The SYL will only encourage parking outside of restrictions thus negating any safety benefits. SYL on the Boughton House side of road with restrictions 9:00-12:00 weekdays would suffice, with DYL on opposite side (North side)
Response 2		1		
Response 3			1	Optimum solution would be residents parking, alternatively SYL on south side and DYL north side. Increased enforcement required.
Response 4			1	Residents parking would be best solution. Suggest SYL on south side, DYL on north side, although concerns that this will not be suitably enforced
Response 5			1	Why could residents not have a permit to ensure their cars are not removed? If permits were granted I would agree. This does not allow enough space for residents cars to be parked especially at weekends for double yellow side
Response 6		1		Double yellow lines both sides of road would be better, but guess this will have to do
Response 7		1		I support this proposal wholeheartedly, being directly at risk from the commuter parked cars.
Response 8			1	E-mail - many points made. Summary is any restrictions will cause problems for residents and residents parking scheme is only option. Best left with no restrictions.
Response 9			1	Make it residents only parking with small charge to administer
