

ANNEX A.

Dear Sir/Madam.

①

I am writing in response to the notice attached to the lamp post in Northfield regarding the proposed double yellow lines.

If you refer to my earlier letter, you will be aware of my objections to this proposal. Some of the issues I raised in that letter, I would like to expand upon.

I understand that votes for or against were roughly, 10 for, 5 against and 2 undecided. I would like to make you fully aware that I am in a minority

of one, as No. 16 is the only

house without a road parking

For my wife and I this is not

an inconsiderable problem as

parking will become increasingly

difficult for ourselves and our

family and friends; thus we

will almost certainly have to

consider off road parking. This

would be a very large sum of

money to find and the problems

involved in organising it are a

constant worry.

None of this is a consideration

to other residents

I would just like to reiterate

that since first being made aware

of the problem by the Council

representative, the bend in question

has been kept consistently clear,

and having recently had some

②

Time off work, I noticed that during the daytime there was just one car parked in the whole of Mountfield. My wife tells me this is not uncommon during the day and therefore I do not see that it is an ongoing problem that needs any restrictions.

If restrictions were considered necessary, could a single line with time restrictions not be the answer?

I know that Loretta mentioning the pavement are one of your concerns. There only delivers weekdays, in working hours other restrictions would be in force. Evenings and weekends would then be unrestricted. This would achieve the aims of the Council and be of enormous benefit to us.

(3)

We are asking for the Council's help as we are in the minority. We fully appreciate you have answers to hand, but do hope a fair and balanced compromise can be found that can satisfy both parties.

Yours faithfully
