

Tabled Update for item 2.4 21/502972/FULL

1. Since reconsulting everyone, we have only received one response from neighbours which was to understand what the change of description meant.

The change of description was to be more precise about what the commercial uses will be, which is why we included (E.(g), B2 and B8) in the description, to ensure neighbours understood what type of commercial uses might come forward on this site.

For completeness, these use classes are:

E.(g) (office/research/industrial process)
B2 (General Industrial)
B8 (Storage & Distribution)
