

Item 2.6 - Tabled

Hi William

We are just checking with wider HCP colleagues as to whether a response is required to the application. It would not be usual for primary care to request a financial contribution towards increasing capacity within general practice as care home residents are unlikely to visit the surgery, the contract held by practices more generally enables GPs to visit the care homes.

We are looking as to whether this is still going to be the case going forward or whether we need to change our approach in line with changes to GP workforce etc but will advise in due course

Kind regards

Zoe
